

# WOLFPACK

WOLFPACK is a 360° RF sensor capable of providing make/model information to the user by searching for control signals and video feeds from drones.

WOLFPACK is suited for stationary installations such as perimeter protection at prisons, military camps, mounted on vehicles or sea vessels. As a standalone unit, it detects and enables triangulation of drones in larger areas.

*WOLFPACK is a 360 degrees direction finding RF drone detector.*

Technical features	WOLFPACK
Frequency ranges	<ul style="list-style-type: none"> <li>• 410-470 MHz</li> <li>• 850-1300 MHz</li> <li>• 2400-2500 MHz</li> <li>• 5150-5990 MHz</li> </ul>
Platform	Software defined radio
Power supply	12-15V DC (115/230V AC power supply included)
Detection time	<5sec
Dimensions	H: 26cm, D: 31.5cm
Weight	5kg
IP rating	IP66
Operational temperature	-30° to +60°C (-22oF to 140oF)
TRL	9
Detection range	1 km within line of sight

## Capability

The WOLFPACK drone detection system is lightweight and portable. It's rugged and light-weight design makes installations on vehicles, buildings or tripods easy and straight forward.

The WOLFPACK is simple to configure and setup. WOLFPACK was designed with operational focus. It is literally a plug and play design and you will be operational within minutes. The 360° coverage and intelligent signal analysis helps to detect the threat direction, type and model of drone. All of the information is displayed on our user-friendly interface IRIS.

## Features developed with the user

WOLFPACK is designed with simplicity in mind. It's Size, Weight and Power provide a competitive edge.

New feature updates are made available on a regular basis and are driven by customer feedback.

WOLFPACK is easy to interface with existing security infrastructure, either through our plug-and-play user interface or on a protocol level – and requires only 2 cables.
